GMAT Online Secure Browser*

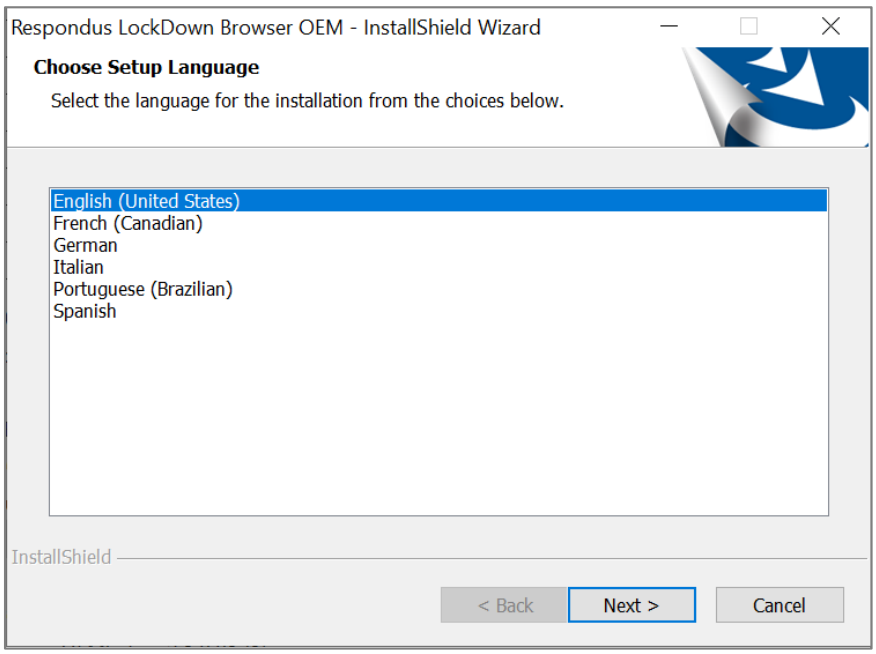

Windows Installation Guide

*provided by Respondus

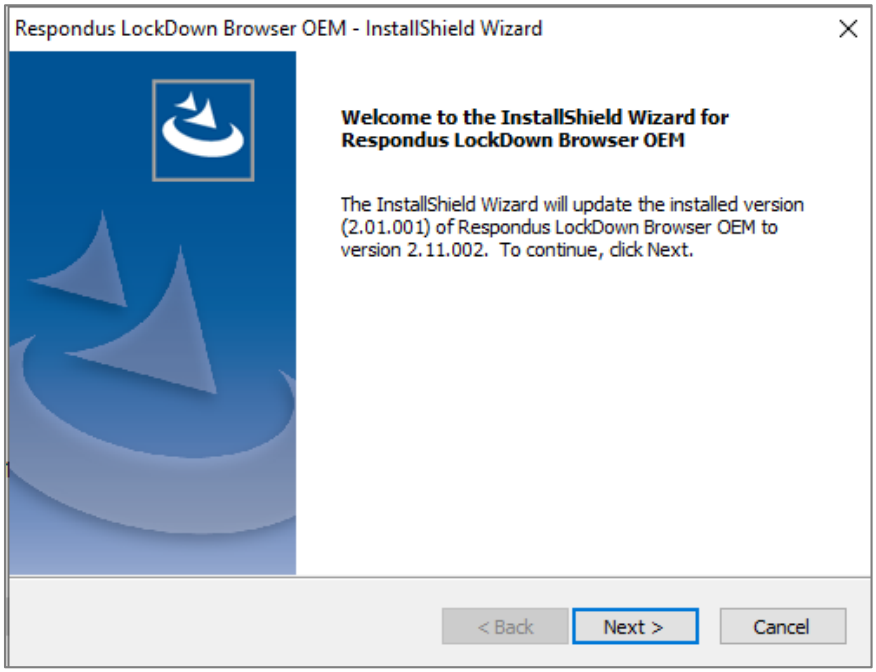

1. **Open the Windows installation file "Windows_RSB_Download_File-v.2.1.1.02.exe" located in your Downloads folder.**

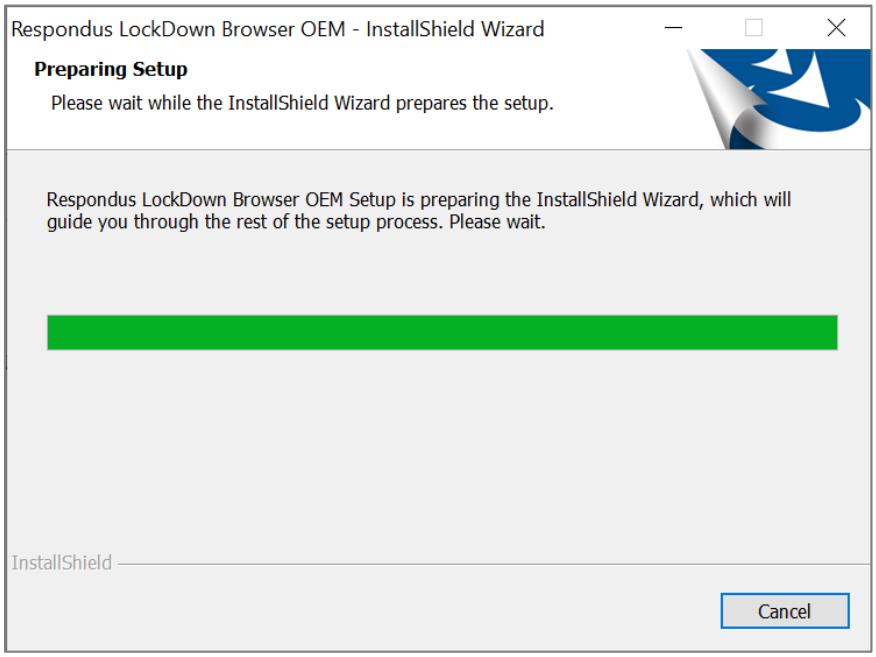

2. **If this is the first time downloading the program, choose your preferred language for the installation and click "Next." (Note: you will see it referred to as Respondus LockDown Browser during the installation).**

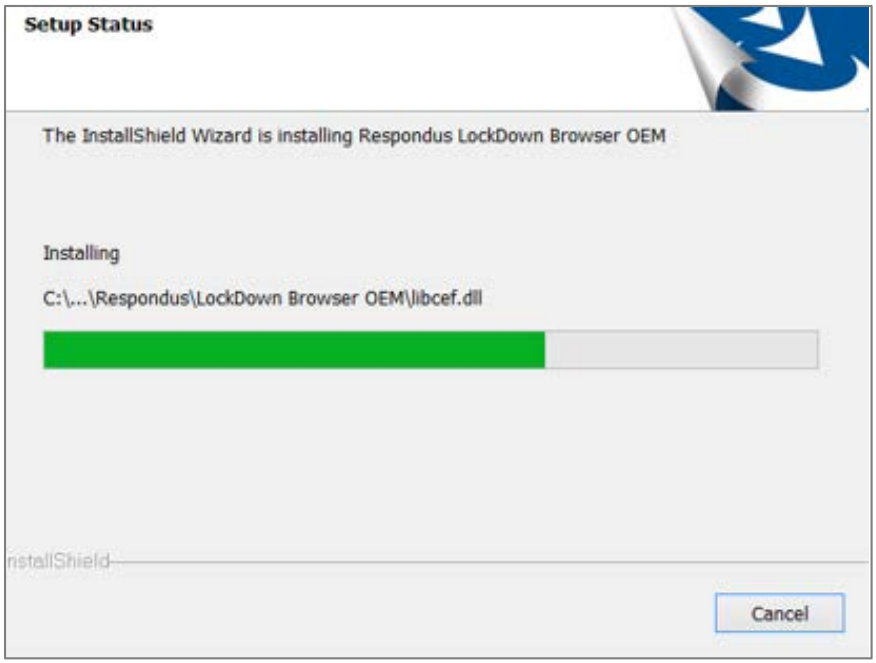

3. **If you had a previous version of the program, you will see the following screen, click "Next":**

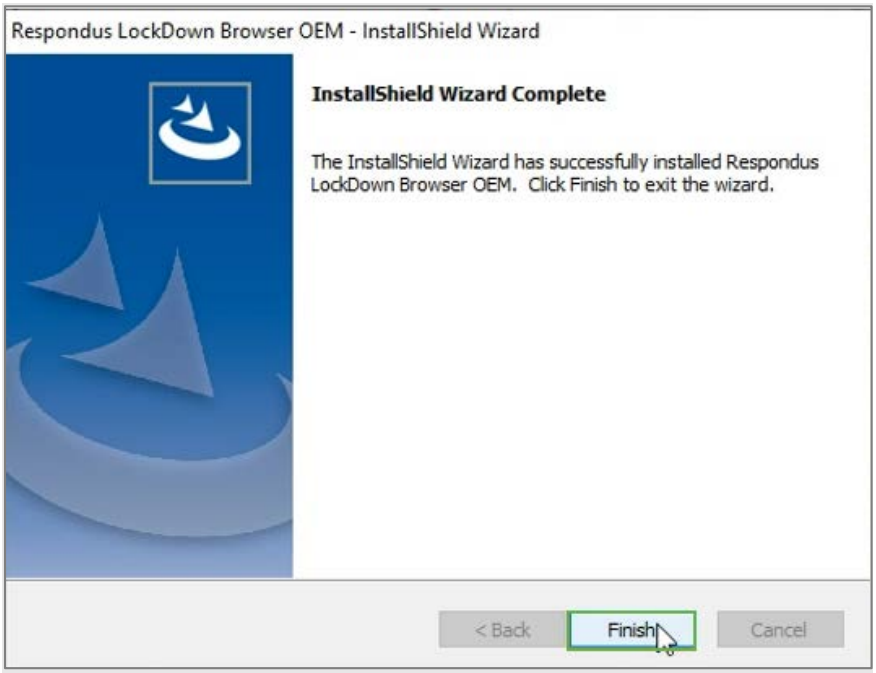

4. **Wait for the install to prepare (this may take a few minutes).**

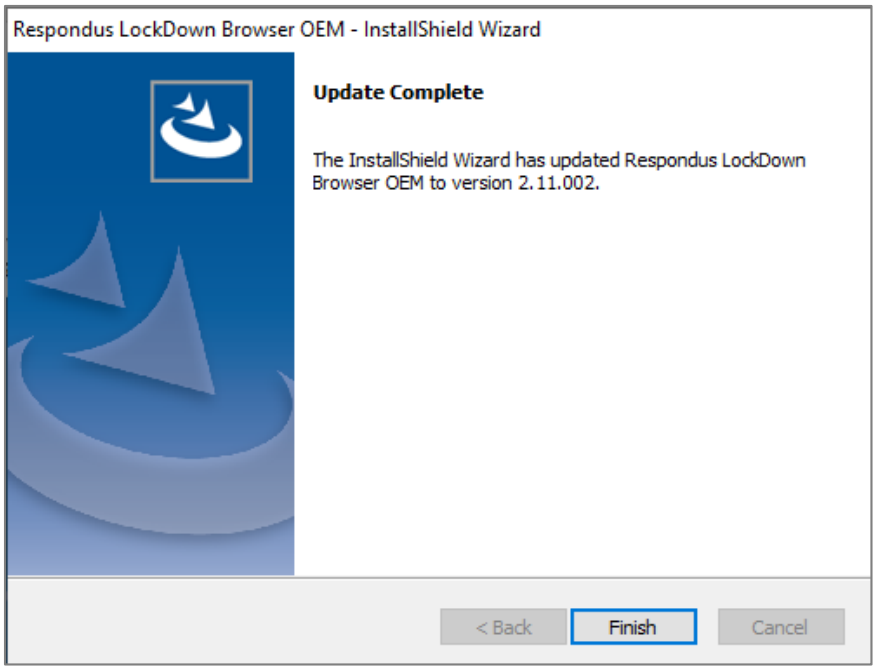

5. **The InstallShield Wizard will install the GMAT Online Secure Browser.**

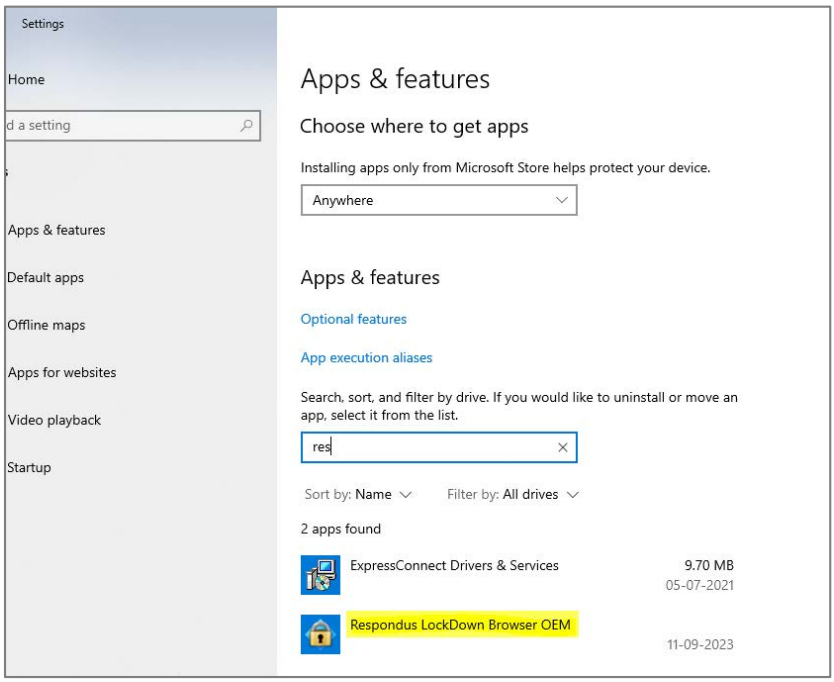

6. **Once the installation is complete, click "Finish."**

7. **If you had a previous version of the program, you will see the following screen:**

8. **The GMAT Online Secure Browser has installed or updated successfully. To confirm that it is on your machine, you can look for the "Respondus LockDown Browser OEM" file in the following location: Settings > Apps or Control Panel > Programs > Programs and Features**

Please Note: *Launching your scheduled GMAT exam will open this Secure Browser which will lock your machine to adhere to the system requirements for the GMAT exam delivered online.*
